Cross Agricultural Machinery - It's The Obvious Choice

Cross Scarifier

Scarifier

The Cross folding Scarifier has been designed to ensure successful grass re-seeding or paddock repair.

Designed in Ireland this Scarifier is able to withstand the toughest of ground conditions and will always provide an accurate seedbed to suit the seed in use.

Used on ploughed ground, sprayed off fields or damaged paddocks, the Scarifier uses a stocks seeder for 100% accuracy.

Features

- *Electric Drive Stocks seeder*
- *Hydraulic Folding*
- *3 or 4 meters wide*
- *2 or 3 rows of tines*
- *Scarifier ripping tines*
- *Extra strength framework*

Adjustable leveling

The Cross Scarifier is adjustable in many different ways.

Each row of tines is individually adjustable and can be folded out of the way if not in use.

The scarifying tips used can also level as well as rip ground for seeding. Each tine is working behind one another at half spacing to the next.

Stocks Seeder

The Cross Scarifier uses a Stocks Fanjet unit. The Stocks unit can be mounted on the 3 or 4 meter machine and is used for 100% accurate seeding.

The Stocks seeder uses an in cab electronic control console and is equipped with robust and reliable high quality motors and actuators.

The semi translucent polyethylene hopper comes in a standard 60 litre size but can be got in a 130 litre size at very little extra cost.
